DEN: 43.2.27

Woody, to date we have met with all of the vendors who have been working on a solution to our barium problem. We have requested concise and specific reports from all parties, and we are being told we will have them within a couple weeks. The one exception is US Filter, who we met with today. They will need between 2-4 weeks to complete their report.

Do these expected completion dates meet your time frame? Please let me know.

Thanks,

Anthony E. Cialella
